

Shop Technician Albany, NY

Job Summary:

A qualified mechanic with a complex set of hand tools and a detailed knowledge of all Cummins Engines to repair and rebuild these engines, both in the shop and in the field. Working with minimal supervision, you will operate most shop machines and testing equipment; install Cummins Engines, both mobile and stationary; contact customers in a diplomatic, workmanlike manner; and submit complete written reports of jobs.

Job Requirements:

- Must have a high school diploma or equivalent education
- 2-3 years of experience is mandatory
- Must be capable of maintaining performance standards as established by Cummins Engine Co. Standard Repair Operations Manual
- May be required to perform other duties assigned by supervisor.
- Possess excellent written and verbal communication skills.
- Proficient personal computer skills
